Cuyamaca Website Redesign

Preliminary Project Wireframes - Version 1

December 6, 2013

beacon technologies

Terms & Definitions

- Accordion-- Specialized content area that opens to display information in expand/contractible rows. This feature is available in the standard and landing page templates; please see applicable slides in the wireframes for examples.
- Bucket-- Specialized content area to display information in boxes with headings and specifically sized photos. This feature is available in the standard and landing page templates; please see applicable slides in the wireframes for examples.
- Business Requirements– This document defines the high-level needs and features of the project by focusing on the capabilities needed by the Stakeholders of the project and the Target Users.
- CMS / Content Management System– CMS is a term for software that allows you to maintain the content of your site without affecting the graphical templates and/or having to know HTML code. There are many packages in this space, in a wide range of price points, but Beacon has selected "Cascade Server" for its content management system and is a close partner with its developer– Hannon Hill. Several members of Beacon's staff work closely with Hannon Hill on product reviews, suggestions and enhancements and Justin Klingman speaks annually at their user conference.
- Content-- All text, images, tables, photos, etc. that make up the web site, but not the layout or graphical elements such as the background or navigation links.
- Content Matrix– This document itemizes every page in the new site and its relationship to other pages in the navigational structure as well as the source of the content to populate the new page (usually either a URL of the current website page OR a Word document containing rewritten content).
- Features– Specific functionality available within one or more templates. For example, the ability to display an interactive Google Map is a "feature" available in the standard and landing page templates.
- Graphical Design– Graphics and color scheme that make up the visual appearance of the website. The new graphical design of the Grossmont and Cuyamaca websites was approved before Beacon Technologies was involved in the project and was used as the basis for the development of the mini sites.
- iFrame-- An HTML page or application embedded within the content area of the new website design. Allows content editors to display information or data housed outside of Cascade within the website. However, the source page should not contain any navigational or
- Layout / Page Layout– The way the different elements on the page are arranged, including header, footer, content areas, navigation, etc.
- Responsive Design– Used to address the ever-changing landscape of devices, browsers, screen sizes and orientations, responsive design incorporates flexible, fluid and adaptive page layouts that adapt to almost any screen size.
- Site Hierarchy– A design document representing a general organizational structure of the top two or three tiers of the site in a hierarchical / flow-chart type format.
- Spectate– Software that integrates with Cascade Server that allows content editors to create web-based forms to be displayed on their web pages.
- Template– A unique page layout available within Cascade Server. A template is the basic shell with some standard and optional features for a page. It is used to create specific pages while maintaining a consistent "look" across the internal pages of the site. Examples of anticipated templates for the Grossmont and Cuyamaca sites are the following (which will be documented in the forthcoming slides of the wireframes document): Homepage, Landing Page, Standard Page, Faculty, Newsletter, Calendar, News, Committees, Photo Gallery, Page Not Found, Search Results.
- UAT (User Acceptance Testing)– Also known as "end user testing," this is the phase of the project where the client tests the site in a "real world" environment. We have specially designated test servers at Beacon that allow you to view the site exactly as it will appear in Production, without opening it up to the public yet. Depending on the size of the project, we try to reserve at least a week (and usually two or more!) for this process, to make sure that we have met your expectations for the project.
- Widget—A reusable feature of a template that can be created in a shared location and used on more than one page. For example, an administrator could create a video widget (including the text title, thumbnail image and Youtube video id of a specific video) in a folder and multiple website editors could select that widget from a list to display it on their page as well, without having to provide all the previously mentioned text, image and video id information.
- Wireframes— Also known as "conceptual page layouts," this is a visual representation the skeletal framework of key elements of the website, including arrangement of the website content, navigational systems, header, footer, etc.

Proposed Site Templates

2 Column Landing Page

There are many variations of passages of Lorem Ipsum available, but the majority have suffered alteration in some form, by injected humour, or randomised words which don't look even slightly believable. If you are going to use a passage of Lorem Ipsum, you need to be sure there isn't anything embarrassing hidden in the middle of text. All the Lorem Ipsum generators on the Internet tend to repeat predefined chunks as necessary, making this the first true generator on the Internet. It uses a dictionary of over 200 Latin words, combined with a handful of model sentence structures, to generate Lorem Ipsum which looks reasonable. The generated Lorem Ipsum is therefore always free from repetition, injected humour, or non-characteristic words etc.

There are many variations of passages of Lorem Ipsum available, but the majority have suffered alteration in some form, by injected humour, or randomised words which don't look even slightly believable. If you are going to use a passage of Lorem Ipsum, you need to be sure there isn't anything embarrassing hidden in the middle of text. Bucket 1»

It is a long established fact that a reader will be distracted by the readable content of a page when looking at its layout. The point of using Lorem Ipsum is that it has a more-or-less normal distribution of letters, as opposed to using 'Content here, content here', making it look like readable English.

▼ **Title 1**

Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing Lorem Ipsum passages, and more recently with desktop publishing software like Aldus PageMaker including versions of Lorem Ipsum.

Paradise Jam Basketball Tournament Tips Off Friday at UVI; UVI Bucs to Spar Against Metropolitan on Saturday

November 22, 2013

The University of the Virgin Islands will host the 2013 Paradise Jam beginning Friday, Nov. 22, in the Sports and Fitness Center on the St. Thomas Campus. The highly anticipated NCAA Division I Basketball tournament tips off at 2:30 p.m. with the men's tournament when the University of Northern Iowa goes up against Loyola Marymount University. This year's teams also include Marist College, the University of Maryland, Providence College, and Vanderbilt, Morgan State and La Salle Universities. The championship men's game is scheduled for 11 p.m. on Monday, Nov. 25.

File Photo: Head Coach Ryan Skinner lead the Buccaneers men's basketball squad to a 62-57 win over Metropolitan University in the 2012 Paradise Jam in front of an enthusiastic home crowd.

The action continues in the women's tournament starting on Thanksgiving Day, Thursday, Nov. 28 to Nov. 30. There are two divisions of women's play. In the tourney's "Island Division" are the University of Kansas, and Xavier, Duke and Central Michigan Universities. Teams playing in the "Reef Division" are the University of Memphis, the University of Texas, Texas A&M University and Syracuse University.

Main Title
There are many variations of passages of Lorem Ipsum available,
but the majority have suffered
me form, by injected
humour, or randomised
ven slightly
believable. If you are go
em
need to be sure there
middle of text. All the
net tend to
repeat predefined ch
e first true
generator on the Inte
0 Latin words,
combined with a har
, to generate
Lorem Ipsum which
Lorem Ipsum
is therefore always free
lour, or non-
characteristic words etc.
