

| | Google calendar | Simple Cascade-based events list | Hannon Hill Calendar | R25 | 25Live |
|---|---|--|---|---|--|
| Example Sites | http://www.gcccd.edu/advancement-communications/districtwide-calendar.html , http://www.cuyamaca.edu/events/ and http://www.grossmont.edu/events/ | http://www.wssu.edu/about/events/2014/default.aspx and http://www.lmc.edu/calendar/ | http://www.uvi.edu/calendar/default.aspx | Depends on calendar interface selected (recommend Hannon Hill format) | http://hartford.edu/calendar/default.aspx |
| Notes from Beacon | If this option is selected, Beacon recommends keeping the separate Google calendars that currently exist and adding one for Athletics (which is shared) and then designing a page with external links to each calendar. | This calendar is a text-based list format and does not have a calendar grid interface. Fully integrated into Cascade server. | Fully integrated into Cascade server. Many modern calendar features and functions. | R25 is currently licenced by GCCCD and would require Beacon to use the Webservices API to feed to a custom developed calendar. | Requires upgrade of R25 license to 25Live, which is a web-based scheduling and calendaring solution. |
| Notes from Vendor | N/A | N/A | http://www.hannonhill.com/news/blog/2013/an-overview-of-customizable-calendars-in-cascade-server.html | For this option, Beacon would recommend using the Hannon Hill calendar format and then setting up a program that would feed calendar events created in R25 to the Hannon Hill calendar. | The 25Live web calendars can be created/customized with an easy-to-use user interface. There are lots of different types of calendars you can create. You can create an unlimited number of web calendars for your various websites. Each calendar can include a unique look-and-feel and a unique set of event data. The calendars are very interactive for your campus community. In addition to RSS/Atom/iCal feed options, calendar visitors can add events to their personal calendar, get reminders of upcoming events via email or text message, get automatic notifications if events get modified, "tweet" about events, etc. |
| Ability to search events via Google custom search | Yes | Yes | Yes | Yes, if using Hannon Hill calendar format to display events | Requires custom development |
| Ability to submit events via website | Yes, with custom development (included in quote below) | Yes | Yes | Yes, if using Hannon Hill calendar format to display events | Yes |
