Grossmont Website Redesign

Preliminary Project Wireframes - Version 2

January 24, 2014
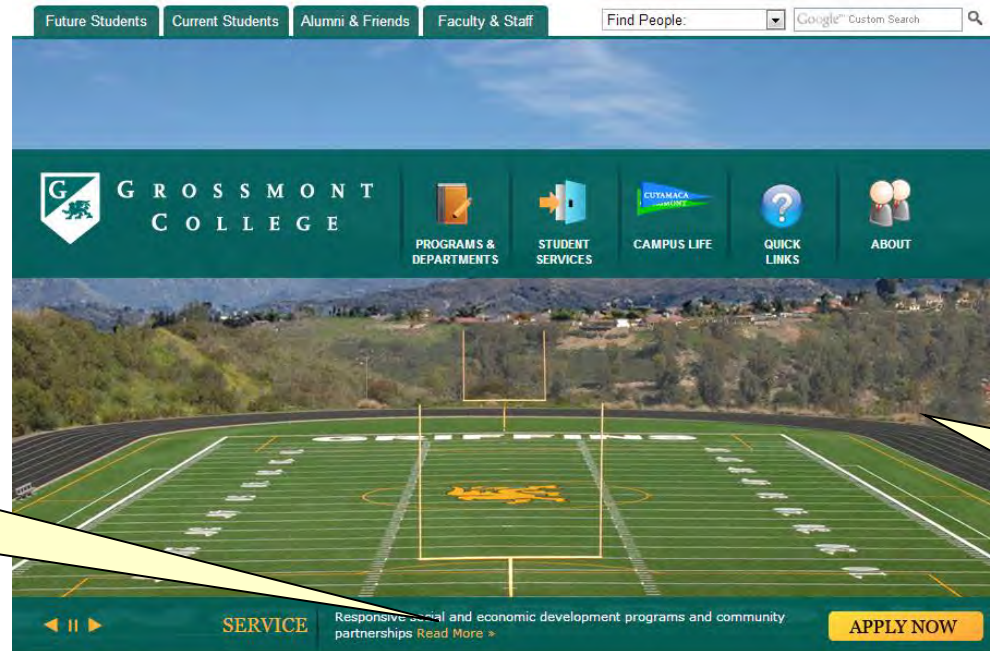

beac(●)n
technologies

Terms & Definitions

* **Accordion**-- Specialized content area that opens to display information in expand/contractible rows. This feature is available in the standard and landing page templates; please see applicable slides in the wireframes for examples.
* **Bucket**-- Specialized content area to display information in boxes with headings and specifically sized photos. This feature is available in the standard and landing page templates; please see applicable slides in the wireframes for examples.
* **Business Requirements–** This document defines the high-level needs and features of the project by focusing on the capabilities needed by the Stakeholders of the project and the Target Users.
* **CMS / Content Management System–** CMS is a term for software that allows you to maintain the content of your site without affecting the graphical templates and/or having to know HTML code. There are many packages in this space, in a wide range of price points, but Beacon has selected "Cascade Server" for its content management system and is a close partner with its developer– Hannon Hill. Several members of Beacon's staff work closely with Hannon Hill on product reviews, suggestions and enhancements and Justin Klingman speaks annually at their user conference.
* **Content**-- All text, images, tables, photos, etc. that make up the web site, but not the layout or graphical elements such as the background or navigation links.
* **Content Matrix–** This document itemizes every page in the new site and its relationship to other pages in the navigational structure as well as the source of the content to populate the new page (usually either a URL of the current website page OR a Word document containing rewritten content).
* **Features–** Specific functionality available within one or more templates. For example, the ability to display an interactive Google Map is a "feature" available in the standard and landing page templates.
* **Graphical Design–** Graphics and color scheme that make up the visual appearance of the website. The new graphical design of the Grossmont and Cuyamaca websites was approved before Beacon Technologies was involved in the project and was used as the basis for the development of the mini sites.
* **iFrame**-- An HTML page or application embedded within the content area of the new website design. Allows content editors to display information or data housed outside of Cascade within the website. However, the source page should not contain any navigational or
* **Layout / Page Layout–** The way the different elements on the page are arranged, including header, footer, content areas, navigation, etc.
* **Responsive Design–** Used to address the ever-changing landscape of devices, browsers, screen sizes and orientations, responsive design incorporates flexible, fluid and adaptive page layouts that adapt to almost any screen size.
* **Site Hierarchy–** A design document representing a general organizational structure of the top two or three tiers of the site in a hierarchical / flow-chart type format.
* **Spectate–** Software that integrates with Cascade Server that allows content editors to create web-based forms to be displayed on their web pages.
* **Template–** A unique page layout available within Cascade Server. A template is the basic shell with some standard and optional features for a page. It is used to create specific pages while maintaining a consistent "look" across the internal pages of the site. Examples of anticipated templates for the Grossmont and Cuyamaca sites are the following (which will be documented in the forthcoming slides of the wireframes document): Homepage, Landing Page, Standard Page, Faculty, Newsletter, Calendar, News, Committees, Photo Gallery, Page Not Found, Search Results.
* **UAT (User Acceptance Testing)–** Also known as "end user testing," this is the phase of the project where the client tests the site in a "real world" environment. We have specially designated test servers at Beacon that allow you to view the site exactly as it will appear in Production, without opening it up to the public yet. Depending on the size of the project, we try to reserve at least a week (and usually two or more!) for this process, to make sure that we have met your expectations for the project.
* **Widget—**A reusable feature of a template that can be created in a shared location and used on more than one page. For example, an administrator could create a video widget (including the text title, thumbnail image and Youtube video id of a specific video) in a folder and multiple website editors could select that widget from a list to display it on their page as well, without having to provide all the previously mentioned text, image and video id information.
* **Wireframes—** Also known as "conceptual page layouts," this is a visual representation the skeletal framework of key elements of the website, including arrangement of the website content, navigational systems, header, footer, etc.

Degrees, Certificates, and Community Education

A publicly supported and **governed** community college, Grossmont College **serves the people** of east San Diego County by offering.

- Transfer degrees
- Certificate programs
- Career technical education
- Workforce development
- Basic skills
- Student support services
- Community education

A History of Growth

Opened in 1964, Grossmont College was originally planned to accommodate 4,800 students. Over time, enrollment has grown to over 16,000. In 1978, a second college opened to serve the people of east San Diego County, **Cuyamaca College** south of El Cajon. Jointly administered as the **Grossmont Cuyamaca Community College District**, these two schools together enroll over 25,000 students annually.

Bond elections to provide funds for the construction of a college campus were held October 10, 1961 and June 5, 1962. Although there was a healthy majority in favor of the bonds, neither election could secure the two-thirds majority needed for passage. On September 18, 1962, 73 percent of the voters approved a $7.5 million bond issue. With the passage of the bond election, the Governing Board moved to purchase a 135-acre site located on a scenic mesa in the Fletcher Hills area adjacent to the cities of El Cajon and La Mesa. Ground was broken for the new campus in December, 1963. Even before construction was completed, the administrative offices were moved to the new campus and classes were officially opened on September 14, 1964. On December 12 of that year, the campus was officially dedicated

The first increment of the campus was planned to accommodate an enrollment of 2,500 day-time students, and the completed campus was expected to hold 4,800 students. On October 18, 1965, a second bond election for $3.5 million was passed by the voters in the area. Passage of this bond issue made it possible to complete the master plan. The new facilities were completed by September 25, 1967. Since that time, student enrollment has increased to a peak of over 16,000.

In the fall of 1978 Cuyamaca College opened. This is the second community college in the Grossmont-Cuyamaca Community College District. Cuyamaca College is located on a 165-acre site in the foothills, south of El Cajon, on Jamacha Boulevard. Because of state legislation in 1970, which changed the term "Junior College" in California codes to that of "Community College," the College became officially known as Grossmont Community College on January 6, 1971, when the Board of Education of the County of San Diego approved a petition from the Grossmont Junior College District requesting this change. On March 5, 1985, the Governing Board officially changed the name of the District to the Grossmont-Cuyamaca Community College District, thereby incorporating the name of our second campus in the title

History of the College

Following several years of study involving both lay and educational groups, the voters of the area approved the formation of the Grossmont Junior College District in an election held November 8, 1960. The first official organizational meeting of the Grossmont Junior College Governing Board was held July 1, 1961. The first college classes convened September 11, 1961 on the Monte Vista High School campus in Spring Valley with an opening enrollment of 1,538.

Bond elections to provide funds for the construction of a college campus were held October 10, 1961 and June 5, 1962. Although there was a healthy majority in favor of the bonds, neither election could secure the two-thirds majority needed for passage. On September 18, 1962, 73 percent of the voters approved a $7.5 million bond issue. With the passage of the bond election, the Governing Board moved to purchase a 135-acre site located on a scenic mesa in the Fletcher Hills area adjacent to the cities of El Cajon and La Mesa. Ground was broken for the new campus in December, 1963. Even before construction was completed, the administrative offices were moved to the new campus and classes were officially opened on September 14, 1964. On December 12 of that year, the campus was officially dedicated

Main Title

There are many variations of passages of Lorem Ipsum available, uffered alteration in some form, by injected humour, or randomised words which don't en slightly evable. If you are going to use a passage of Lorem Ipsum, you need to be sure there isn't ing embarrassing hidden in the middle of text. All the Lorem Ipsum generators on the Internet tend to repea defined chunks as necessary, making this the first true generator on the Internet. It uses a dictionary of ov 00 Latin words, combined with a handful of model sentence structures, to generate Lorem Ipsum which lo reasonable. The generated Lorem Ipsum is therefore always free from repetition, injected humour, or non-ch acteristic words etc.

▼ **Title 1**

Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing Lorem Ipsum passages, and more recently with desktop publishing software like Aldus PageMaker including versions of Lorem Ipsum.

Automotive Technology

Program Information

- The automotive technology curriculum provides for entry level skills in the automotive field.
- The program is designed to impart in-depth technical skills as required in today's highly technical automotive field.
- Preparation for employment in the automotive and/or transportation trades, with upgrading and specialization skills for those currently employed are stressed.
- Emphasizes practical experience in actual repairs under simulated shop conditions

CA Bar- Approved Emission Training Program

Update Smog Check Training

The Bureau of Automotive Repair (BAR) requires all licensed Smog Check technicians to complete update training every two years prior to license renewal. For details go to our smog update training page.

Annual Competition

The 33rd Annual High School Automotive Skills Day Competition

This school years competition will take place on Saturday, May 5, 2011 at Cuyamaca College.

For more information contact by email: Chris Branton or call him at (619) 660-4213.

Sponsors - We are seeking sponsors to help with awards and prizes. If you can help contact Chris Branton.

Paradise Jam Basketball Tournament Tips Off Friday at UVI; UVI Bucs to Spar Against Metropolitan on Saturday

November 22, 2013

The University of the Virgin Islands will host the 2013 Paradise Jam beginning Friday, Nov. 22, in the Sports and Fitness Center on the St. Thomas Campus. The highly anticipated NCAA Division I Basketball tournament tips off at 2:30 p.m. with the men's tournament when the University of Northern Iowa goes up against Loyola Marymount University. This year's teams also include Marist College, the University of Maryland, Providence College, and Vanderbilt, Morgan State and La Salle Universities. The championship men's game is scheduled for 11 p.m. on Monday, Nov. 25.

File Photo: Head Coach Ryan Skinner lead the Buccaneers men's basketball squad to a 62-57 win over Metropolitan University in the 2012 Paradise Jam in front of an enthusiastic home crowd.

The action continues in the women's tournament starting on Thanksgiving Day, Thursday, Nov. 28 to Nov. 30. There are two divisions of women's play. In the tourney's "Island Division" are the University of Kansas, and Xavier, Duke and Central Michigan Universities. Teams playing in the "Reef Division" are the University of Memphis, the University of Texas, Texas A&M University and Syracuse University.

NOTICE

Emergency Message Example

This is just an example of the emergency message that can be displayed on the GCCCD District Home page only.

There is a checkbox to display the message and a choice of either blue or red banner color depending on how extreme the emergency is.

Permissions are set up to give appropriate staff access to the emergency banner. Having permissions to the home page does not automatically give permissions to the emergency content area.
You can look at the functionality in the default-dev page under the District website.

Emergency message option #3: Message only displayed on home page. . Does not have to be closed by visitor. Same message displayed until turned off or changed by administrator

Main Title

There are many variations of passages of Lorem Ipsum available, but the majority have suffered alteration in some form, by injected humour, or randomised words which don't look even slightly believable. If you are going to use a passage of Lorem Ipsum, you need to be sure there isn't anything embarrassing hidden in the middle of text. All the Lorem Ipsum generators on the Internet tend to repeat predefined chunks as necessary, making this the first true generator on the Internet. It uses a dictionary of over 200 Latin words, combined with a handful of model sentence structures, to generate Lorem Ipsum which l... .. The generated Lorem Ipsum is therefore alwa... ...jected humour, ... characteristic w...
