

# Attitude Is Everything

Having a safe attitude is more than just following the rules. It's that extra something that means you care about safety. You show you keep safety in mind when you...

**Plan ahead** for the job, including a review of the procedures and equipment.

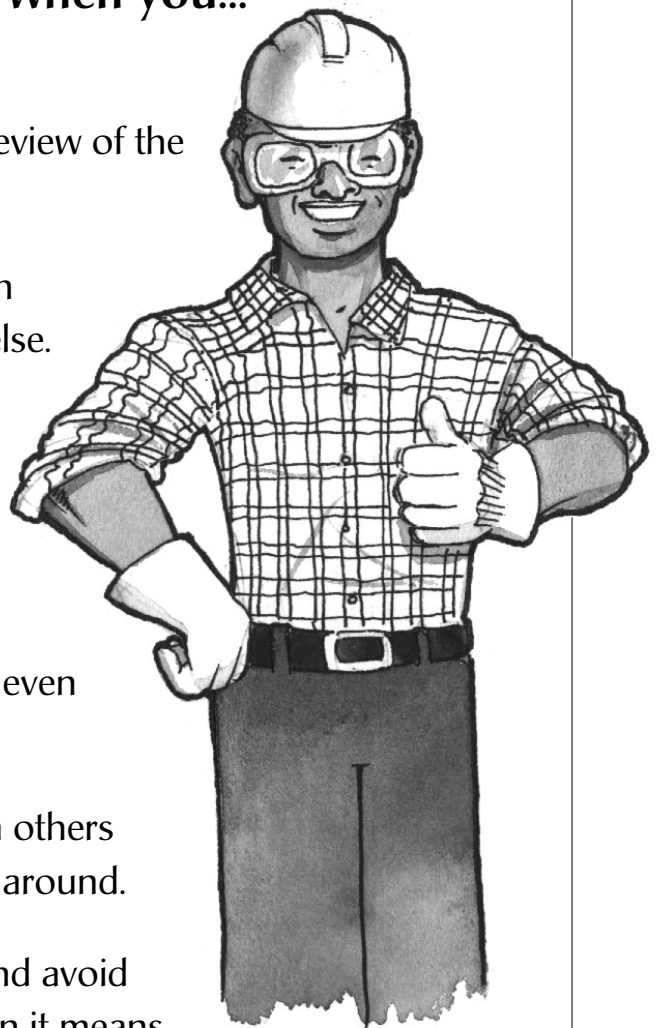

**Focus** on the job you're doing, even when you'd rather be doing something else.

**Take time** to do the job right the first time, even if it means getting out extra safety equipment and going over procedures.

**Take responsibility** for safety, even when it's "not my job."

**Do the right thing**, even when others want you to take shortcuts or fool around.

**Know the risks** of unsafe tasks, and avoid them whenever you can, even when it means taking more time to get the job done safely.

ATTITUDE & AWARENESS
