Extended Cabinet Rep	TBD	<input type="checkbox"/>	Recorder: Public Safety Administrative Support	Cheyenne Castellanos	<input checked="" type="checkbox"/>

Item	Discussion
1. Camera Project Update	<p>Nicole showed the map of the camera placements at both Grossmont and Cuyamaca. The map provides a general idea of the areas the cameras will be able see but these are schematic drawings and are not accurate with a field of view estimate. Trees and other visual items may complicate the line of site drawn on a simplistic map. All of the cameras are the same style but the lens are different on some, which will include features such as zooming in and out. The bid for the cameras will be sent in early April 2023 and the construction could happen as early as Fall 2023 or Spring 2024.</p> <p>GC and CC Senate reps are requesting this to be shared again with the Academic Senate because they are concerned about student privacy and profiling. They stated that maps were never shared. Nicole resent an email to the council from September</p>

	<p>2022 in which all items were attached for sharing with constituencies. The camera maps, MOU, placement procedures and operating procedures were all discussed and shown and discussed at the PSC meeting on 9/19/22. Nicole went on to further explain again that the cameras can be deterrents to stop crime ahead of time. Nicole explained again that the cameras are not actively monitored and only used when a crime has been committed and an investigation must begin. In addition, the cameras may be used for deputies to look ahead at 911 situations which occur on campus before they arrive, further providing safety and de-escalation.</p> <p>There was concern from CC student trustee that the cameras will record conversations or have microphone capabilities. Information from Google was inserted into the chat: "California Penal Code 631 relates to wiretapping and makes it illegal to use any method (physical or digital) to make unauthorized access to someones conversation. This most often relates to phone lines and telephone calls but can also relate to any other digital method of communication such as VOIP." Nicole explained multipole times that the cameras do not transmit sound and do not have the capability to do so. There is physically no microphone built into the cameras. GC student trustee pointed out that all other colleges and schools in the area use the exact same cameras. Student trustee again reiterated that we are not licensed to monitor or record cameras here in California. Ken advised that we may bring back our consultant to speak on this subject again we need to.</p>
<p>2. Public Safety Taskforce Recommendations Summary – Continue conversation and review any items not covered previously</p>	<p>Nicole noted that there were a few items we did not cover at the last meeting. However, when introducing new regulations from the CCC office, she noted that the last remaining items were ingrained in the title X changes. Therefore, she asked that they skip this item and begin the planning for the new legislation. No one spoke at this point and therefor Nicole moved on.</p>
<p>3. CCC Memorandum Update</p>	<p>Nicole shared, "A call to action for California Community Colleges". They have helped create equity plans and urgency following the push for reforms. Nicole asked for support with a small taskforce to begin the plan of action to address regulations and recommendations. Members asked if a google document could be created and everyone from the PSC can provide feedback to have a plan of action by May 2023. Only three people offered assistance in beginning the plan to cover the new regulations. Nicole will be reaching out to them to schedule a meeting.</p>
<p>Next Meeting- April 20, 2023</p>
