

Make the Earth your Valentine this year!

Show the *Earth* some **Love**

Tips for a Sustainable Valentine's Day:

- ♥ Make a card out of recycled paper, find a local artist who uses recycled materials, or send a digital card.
- ♥ Buy flowers from a local farmers market – the flowers will be in season, local, and you'll be supporting a local farmer.
- ♥ Make your special date-meal vegetarian or vegan. You will help conserve water, use of pesticides, and avoid extra calories 😊
- ♥ Choose experience over materials. Get outside and enjoy nature together, pack a picnic or take a walk.
- ♥ Choose organic (chocolate, wine, dinner) when you can. The Earth will LOVE you for it.
- ♥ Please don't print this flyer!
