Agenda:

Item	Summary/Action
1. ERP Systems <ul style="list-style-type: none"> a. Phase I Colleague Upgrades <ul style="list-style-type: none"> i. Self-Service/Ed Planning ii. CRM Recruit iii. Colleague Assessment Projects 	<p>AVC Tarman provided an update on Colleague upgrades. The deadline to implement for fall registration was met and successful but there was a performance issue on the first day of classes. This should be fully resolved once on the latest version of Colleague for which we need to be on the latest linux. The second phase will be the ed planning piece which will take place in stages. First is for the counseling side so they can get their work off paper and into the system. Second will be to get counselors involved in using the tool with students. Third stage will be an audit of degree audit system as ideally, we would like it interacting with our current system. We will need to see if product can do what we need it to do. Final piece would be to incorporate curriculum tracks (program maps).</p> <p>Regarding CRM Recruit, the functional teams have been working all week. It is a very robust project and we may have to do a quick BPA on communications process.</p> <p>Other Colleague related items include a proposed demo of Advise to have a holistic look at a student based on activity. We are looking a Colleague financial aid, but it currently can't handle CA ISER data to process California awards. Other schools are highly interested and they are exploring how it could happen. With additional information, we will then revisit if we can move to Colleague FA system.</p>
2. STANDING ITEM: Security <ul style="list-style-type: none"> a. Security Plan – Training b. Windows 10 – Admin Rights 	<p>The IT Security Workgroup has been working to put together a security plan. Several goals for the year have been established, one of which is employee training. This would result in two major accomplishments; more</p>

	<p>secure and demonstrate a reasonable course of action to protect. A consultant is coming in to present some services that may help us with cybersecurity.</p> <p>Regarding Windows 10 Admin rights, we really want to communicate with faculty in particular in terms of plans and roll-out. The objective is to talk about risks and be honest as to why it is essential and develop strategies to allow access to those with a true need. IT is working with ICS on both campuses and will be piloting with faculty this term.</p>
<p>3. Infrastructure Projects Updates</p> <ul style="list-style-type: none"> a. Linux Migration b. VOIP c. Wireless d. Network Infrastructure 	<p>Tarman highlighted as mentioned in item 1 that the linux migration is critical to the ERP systems. The VOIP project continues to move forward as we work to schedule an initial meeting with PacketFusion regarding the new phone system installation. Wireless installation continues on both campuses with a recent meeting taking place on the Grossmont campus to determine placement for outdoor wireless access points. Network switch deployment also continues with 80 completed at Grossmont and 52 at Cuyamaca.</p>
4. BP/AP 3720	The Council approved the redline edits as presented.
5. Project List Review	AVC Tarman reviewed the current IT Projects list with Council.
6. Information Item – Library Services Platform	<p>This is a potential project currently being offered by the state. They will pay for implementation cost. Grossmont College Senate has passed a resolution in favor and Cuyamaca is considering as well. Implementation and data migration would begin January 2019. IT would need some more information regarding real effort needed on our end.</p> <p>https://ccotechcenter.org/projects/library-resources</p>
<p>7. Next Meeting:</p> <ul style="list-style-type: none"> ▪ Thursday, October 18, 2018 3:00 – 4:30 pm
