Top IT Priorities for Spring 2021

Grossmont College and Cuyamaca College
Status Update as of 2/17/2021

Cuyamaca College

1. Comevo / Cynosure

   Status:

   Cynosure: The system is up and running for Cuyamaca for Spring and Grossmont received updates from the vendor as well.

   Comevo: An initial meeting with Cuyamaca representatives has been scheduled for February 26 to discuss high level application decisions that need to be made before moving forward with a kick-off meeting.

2. Virtual Desktop

   Status: IT completed internal pilot testing and is now branching out to users on both campuses to further test pilot before launching district-wide.

3. Adobe Sign (Electronic Signatures)

   Status: A&R and Business Services at Cuyamaca obtained access and are working on implementation. Greg Vega offered to work with Barbara Gallego at Grossmont to help get them up and running as well.

4. Coding for Student Groups

   Status: This project is to track special cohorts (athletes, dual enrollment, middle college, formerly incarcerated, etc.) in Colleague and provide MIS reporting. As a part of this, students will be automatically billed correctly and provided specific communications. District IT and A&R at both colleges are working on this. There is a plan in place and the goal is to have it ready for Fall 2021.

Grossmont College

1. CCCMyPath

   Status: No update at this time. Revisit once new interim leadership is in place over IT.

2. Self-Service Update

   Status: A demo meeting occurred with the Chancellor, VPs and faculty to better describe what the issues are. Another meeting with this group will occur to demonstrate the current custom functionality in WebAdvisor and what's available in Self Service. A gap analysis will be conducted to determine what, if any, customizations should be invested in. Example: current customization in WebAdvisor is faculty can download rosters and print them out. In Self-Service this can be done online.

3. Credentials/Parchment

   Status: This is complete. Students have always been able to order transcripts online but they now go to this company directly, which reduces workload for A&R staff.

4. Maxient

   Status: Training was completed with the vendor in late January and data integration testing with Colleague is complete and will go live on Friday. All conduct/grievance matters will be handled via Maxient starting Friday. Student Affairs at both colleges will be finalizing the complaint forms to be included in Maxient.

5. CampusLogic

   Status: No Update at this time. Revisit once new interim leadership is in place over IT.

6. Cranium Café

   Status: No Update at this time. Revisit once new interim leadership is in place over IT.

7. Leganto

   Status: Complete.

8. Microsoft 365 Integration

   Status: Moving through college level vetting (tech committees) and district-wide Canvas Working Group.

9. Microsoft Intune

   Status: No Update at this time. Revisit once new interim leadership is in place over IT.
