

Top IT Priorities for Spring 2021

Grossmont College and Cuyamaca College
Status Update as of 3/17/2021

Cuyamaca College

1. Comevo / Cynosure

Status:

Cynosure: The system is operational for Cuyamaca for Spring and Grossmont received updates from the vendor as well.

Comevo: There is now a plan in place to roll out orientation and advising for Cuyamaca in September. There are 3 outstanding pieces for IT: 1) Obtain code from Southwestern so that applicants can authenticate against their WebAdvisor accounts. This was just received 3/16/2021. 2) Develop the process to send the Multiple Measure scores along with the area of study (smart code) to Comevo. 3) Develop the process to import the completion codes into Colleague

2. Virtual Desktop

Status: Working with Microsoft on ability to provide remote desktop support. Once that is in place, IT will branch out to more end users on both campuses for further testing.

3. Adobe Sign (Electronic Signatures)

Status: A&R and Business Services at Cuyamaca obtained access and are working on implementation. Initial testing is indicating that it might not meet the needs of the campus (example: can't attach documents).

4. Coding for Student Groups

Status: This project is to track special cohorts (athletes, dual enrollment, middle college, formerly incarcerated, etc.) in Colleague and provide MIS reporting. As a part of this, students will be automatically billed correctly and provided specific communications. District IT and A&R at both colleges are working on this. There is a plan in place and the goal is to have it ready for Fall 2021.

Grossmont College

1. CCCMyPath

Status: Grossmont went live February 22. Cuyamaca is in progress.

2. Self-Service Update

Status: The Registration Triage Group is reviewing current custom functionality in WebAdvisor versus what's available in Self Service. A gap analysis is being conducted to determine what, if any, customizations should be invested in. Example: current customization in WebAdvisor is faculty can download rosters and print them out. In Self-Service this can be done online.

3. CampusLogic

Status: Both campuses plan to launch March 30 in preparation for the new award year. SSO (Single Sign On) currently not available for this project. Students will generate their own user name and password. Data dumps will occur manually between CampusLogic and SAM.

4. Cranium Café

Status: No Update at this time. Revisit once new interim leadership is in place over IT.

5. Microsoft 365 Integration with Canvas

Status: IT working with Canvas Working Group to determine if this can be handled similarly to an LTI (Learning Tools Interoperability aka building block).

6. Microsoft Intune

Status: No Update at this time. Revisit once new interim leadership is in place over IT.
